

OBTAINING MEDICAL EVIDENCE TO SUPPORT AN APPLICATION FOR RETURN TO STUDY

When obtaining medical evidence to support an application for returning to your studies, **please show this to the medical professional providing the evidence**, to ensure it will meet the necessary requirements.

To the medical practitioner

This student has previously taken a break from their studies on medical grounds and we are looking for **evidence from you** that this student has sufficiently recovered from their condition **to enable them to return to their course**.

Please provide details of

- the status of the medical condition previously disclosed
- whether, in your opinion, this student is now fit to return to their studies

Should you feel the student would be better to return to a different study mode, e.g. part time rather than a full time course, please indicate this in your response.

For your information we attach a copy of the Programme Demands Document for the course the student is due to return to.
